2 Yvonne runs a service business. The financial year end is 31 December.

On 1 April 2023, the business obtained a bank loan of \$300 000 at an interest rate of 3% per annum. The loan is to be paid equally over 10 years.

The partial principal sum repayment and interest are to be made every year starting 31 March 2024.

REQUIRED

(a) Prepare journal entries to record the borrowing on 1 April 2023 and the interest expense incurred on 31 December 2023. Narrations are not required.

Date	Particulars	Debit	Credit
2023		\$	\$
Apr 1	Cash at bank	300,000	
	Bank loan MATH STUDIO		300,000 [1]
Dec 31	Interest expense (\$300,000x3%)x9/12 [1]	6,750	
Interest expense payable			6,750 [1]

(b) Prepare an extract of the statement of financial position as at 31 December 2023, showing only the liabilities section.

Yvonne

2023 (extract)
\$
270,000 [1
30,000 [1]
6,750
[10F]

[3]

(c) Use a suitable accounting theory to explain why interest expense is recorded. According to the matching theory [1], interest expense incurred must be matched against

the income earned from using the loan to operate business in the same accounting
period to determine profit for that period. [1]
[2]

[Total: 8]

3 Iris owns a business selling eyewear. For the year ended 31 August 2023, she had the following information pertaining to her rental expenses account.

Rental expense					
Date	Particulars		Debit	Credit	Balance
2022			\$	\$	\$
Sep 1	Rent expense pay	rable		300	300 Cr
2023					
Aug 30	Cash at bank		4 500		4 200
					Dr
Aug 31	Prepaid rent			600	3 600
					Dr
		?			

REQUIRED

(a) State the account in which the amount of rent expense is transferred to at the end of the financial year.

Income summary [1]

[1]

[1]

(b) Interpret the entries in the rental expense account on:

(i) 1 September 2022

\$300 in rent expense was incurred last year but not paid, it will be paid this year. [1]

(ii) 30 August 2023 The business paid \$4,500 in rent expense by cheque. [1]

		[1]
	(iii) 31 August 2023	
	\$600 in rent expense was paid but not incurred, it will be incurred next financial year. [1]	
		[1]
(c)	Use an accounting theory to explain the recording on 31 August 2023.	• •
• •	According to the accrual basis of accounting [1], only expenses incurred in the relevant	
	accounting period should be recorded, regardless of whether cash is paid. [1]	
		[2]
		[2]

(d) Complete the following table by stating the effect 'understated' or 'overstated' on income and profit for the period when each item is **not adjusted**.

	Item	Effect on Income	Effect on Profit for the Period
(i)	Commission income received in advance	Overstated [0.5]	Overstated [0.5]
(i	i) Income receivable	Understated [0.5]	Understated [0.5]

4 Cornelius is the owner of a trading business and has the following information extracted for the year ended 30 June 2024.

	\$
Inventory	30 600
Sales revenue	250 000
Sales returns	7 900
Cost of sales	185 000

The inventory as at 1 July 2023 is \$25 800.

REQUIRED

(a) Calculate the following for the year ended 30 June 2024. Show your answers to two decimal places.

(i) Rate of inventory turnover

Rate of inventory turnover = Cost of sales/Average inventory
= \$185,000/(\$25,800+\$30,600)/2
= \$185,000/\$28,200
= 6.56 times [1]
[4]

[1]

(ii) Days sales in inventory Days sales in inventory = Average inventory/Cost of	of sales x 365 days
= \$28,200/\$185,000 x	365 days
= 55.64 days <mark>[1]</mark>	

[1]

(b) Evaluate Cornelius' efficiency in inventory management against its competitor, Aman. Aman's rate of inventory turnover is 10 times, and days sales in inventory is 36.50 days.

Cornelius' rate of inventory turnover of 6.56 times is worse than Aman's rate of inventory

turnover of 10 times. [1]

This could be due to Cornelius taking a longer time to sell its goods

compared to Aman. [1]

	than Aman's of 36.50 days. [1]
	Hence, Cornelius is less efficient at managing its inventory than Aman. [1]
	[4
(c)	[Turn over State two non-accounting information to consider when determining which non-current asset to purchase. Purpose of the non-current asset/Features of the non-current asset/Customers' review
	of the non-current asset/Warranty [2 marks for any 2 answers]
	[2
Сс	rnelius oversees authorising cheque payments of the business.
RE	QUIRED MATH STUDIO
(d)	State the purpose of source documents. To provide evidence that a transaction has taken place [0.5] and to record the transaction
	at the original cost that it occurred [0.5].
(e)	State and explain one type of internal control over the handling of cash. Segregation of duties [1] – Cash handling and cash recording duties are done by different
	employees [1]. Custody of cash [1] – Secure cash in a locked storage [1].
	Authorisation [1] – Obtain proper approvals for all payments from
	authorised personnel [1]. Bank reconciliation [1] – Compare business' records with bank
	statements to identify items causing differences in ending balances [1].
(f)	[2 Explain objectivity. Accounting information recorded must be supported by reliable and verifiable evidence so
	that financial statements are free from biases and opinions. [1]

Data for Question 1

Jayden is the owner of Money Counts Pte Ltd, an accounting firm. He has the following balances extracted from its books on 31 May 2024.

\$

	Ψ
Retained earnings, 1 June 2023	39 990
Share capital, 200 000 ordinary shares	240 000
5% bank loan	100 000
Accounting fee revenue	98 700
Interest on bank loan	4 000
Stationery	3 600
Salaries	89 000
Advertising	12 100
Commission income	8 000
Trade receivables	14 780
Trade payables	2 300
Cash at bank (cr)	5 890
Office equipment at cost TH STUDIO	130 000
Fixtures and fittings at cost	250 000
Motor vehicles at cost	44 000
Accumulated depreciation:	
Office equipment	3 000
Fixtures and fittings	10 000
Motor vehicles	39 600

Additional information

- 1. \$1 800 in accounting fee revenue received will only be earned in June 2024.
- 2. During the year, a cheque \$150 was received on the sale of all the motor vehicles. No entry on the sale was made in the books. No depreciation is to be charged in the year of sale.
- 3. Depreciation policy:
 - Office equipment 10% per annum using the reducing balance method.
 - Fixtures and fittings 5 years with a scrap value of \$4 900 using the straight-line method.
- 4. A trade receivable owing \$780 went bankrupt but has not been written off yet.
- 5. Following a review of the trade receivables, 2% of the trade receivables were estimated to be uncollectible.
- 6. Commission income earned amounted to \$10 000 per year, and advertising, \$870, was prepaid.
- 7. 100 000 ordinary shares at \$1.20 each were issued and fully paid up during the year.
- 8. Dividends at \$0.08 per share were declared and will be paid on 1 July 2024.
- 9. Interest on bank loan has not been fully paid and a repayment of \$10 000 of the bank loan is to be made on 1 July 2024.

4 Umar owns a sports equipment business and extracted the following information from his books of business on 1 July 2023.

Allowance for impairment of trade receivables \$4 500

The following transactions took place during the financial year 30 June 2024.

- 1 On 6 December 2023, Shiraz Holdings announced its departure from the industry and that it would not be able to repay its debt of \$1 800 owing to Umar. This amount is to be written off.
- 2 On 18 February 2024, Jayla Enterprise confirmed that it was ending its business and could only pay 40 cents for every dollar of its outstanding debt of \$2 600. On the same day, Umar received a cheque from Jayla Enterprise for the amount it could pay.

On 30 June 2024, the trade receivables balance was \$50 500 and Umar maintains an allowance of impairment of trade receivables at 2% of the trade receivables balance at every financial year.

REQUIRED

(a) Prepare the allowance for impairment of trade receivables account for the year ended 30 June 2024.

(b) Use an accounting theory to explain the purpose of recording an allowance for impairment of trade receivables.

Umar sells its goods mainly on credit. The credit policy to his customers is as follow.

- 1 Credit period is 15 days.
- 2 Cash discount 1% is given if payment is made earlier within 5 days. Most of Umar's customers are able to pay within 5 days.

Mavis Enterprise, an online sports shop, has approached Umar to buy sports equipment on credit. As Mavis Enterprise has only been in business for under one year, Umar did his research on Mavis Enterprise and found the following information: UDIO

- 1 Mavis Enterprise takes an average of 17 days to repay its debts owing.
- 2 It has a monthly trade receivables balance of \$35 000 compared to the industry average of \$10,000.
- 3 Mavis Enterprise does not have a physical shop and only operates online.
- 4 More customers are buying from online shops due to convenience.
- 5 In promoting its products, Mavis Enterprise is highly active on all social media platforms and has an average of 70 000 followers on social media.

REQUIRED

(c) Advise Umar if he should sell on credit to Mavis Enterprise. Justify your advice with three reasons.

(b) Prepare the bank reconciliation statement as at 30 June 2024.

Ho Trading

Bank reconciliation statement as at	30 June 2024 [0.5]	
	\$	\$
Balance as per bank statement (Debit)		(3,509) <mark>[0.5</mark>]
Add: Deposits in transit [0.5]		
Shahidah Sports	7,800 [0.5]	
Joy & Hope	14,800 [0.5]	
Brendan Trading	200 [0.5]	22,800
Less: Cheques not yet presented [0.5]		
Yan Shan & Sisters (cheque no. 6790)		(800) [0.5]
Adjusted balance as per cash at bank account		18,491

[4]

(c) State one reason for a bank to reject a cheque.

Insufficient funds in the payer's account, cheque has expired or is post-dated, information is

not consistent or not complete [1m for any 1 reasonable answer]

	\$
Fixtures and fittings	90 000
Inventory	11 800
Trade receivables	8 700
Allowance for impairment of trade receivables	700
Prepaid advertising	400
Cash in hand	600
10-year Bank loan	63 000
Current portion of long-term borrowings	7 000
Trade payables	1 100
Salaries expense payable	2 340
Bank overdraft	6 320

Additional information

- 1 The business' return on equity as at 31 March 2023 was 36.44%.
- 2 The business had a beginning equity balance of \$22 450 on 1 April 2023.
- 3 For the year ended 31 March 2024, net sales revenue amounted to \$70 000, and total operating expenses amounted to \$62 000.

REQUIRED

- (a) Calculate the following as at 31 March 2024. Show your workings to two decimal places.
 - (i) Current ratio

Current ratio = Total current assets/Total current liabilities [1]

 =\$(11,800+8,700-700+400+600)/\$(7,000+1,100+2,340+6,320)
 = \$20,800/\$16,760
= 1.24 [1]

[2]

(ii) Quick ratio

Quick ratio = Total current assets- Prepayments - Inventory /Total current liabilities [1]

 = \$20,800 - \$400 - \$11,800/\$16,760
 = \$8,600/\$16,760
 = 0.51 [1]

[2]

ሑ

(iii) Return on equity

Return on equity = Profit for the period/Average equity x 100% [1]

= \$70,000-\$62,000/\$(22,450+31,040)/2 x 100%	
= \$8,000/\$26,745 x 100%	
= 29.91% [1]	
Ending equity = \$110,800-\$79,760 = \$31,040 [1]	
Assets = \$(90,000+11,800+8,700-700+400+600) = \$110,800	
Liabilities = \$(63,000+7,000+1,100+2,340+6,320) = \$79,760	
	[3]

For the previous year ended 31 March 2023, the business' current ratio was 2.43 and its quick ratio was 1.87.

REQUIRED

(b) Evaluate Emily Trading over the two years ended 31 March 2023 and 31 March 2024. Use the information provided and your answer to **part (a) (i) and (ii)** to support your answer.

MATH STUDIO

The current ratio has worsened from 2.43 in 2023 to 1.24 in 2024. [1]

In 2024, this falls below the general benchmark of 2. [1]

This means that the business has insufficient current assets to meet its

current liabilities in 2024. [1]

The quick ratio has worsened from 1.87 in 2023 to 0.51 in 2024. [1]

In 2024, this falls below the general benchmark of 1. [1]

This means that the business has insufficient quick assets to meet its

current liabilities in 2024. [1]

This could be due to a bank overdraft position of \$6,320 in 2024. [1]

A negative cash balance means that business would not have cash to pay for its daily

operating expenses [1].

The business current liabilities could have increased due to part of the 10-year loan being

repaid within a year. [1]

Overall, liquidity has worsened in 2024 from 2023. [No marks awarded for conclusion.]

4 Umar owns a sports equipment business and extracted the following information from his books of business on 1 July 2023.

Allowance for impairment of trade receivables \$4 500

The following transactions took place during the financial year 30 June 2024.

- 1 On 6 December 2023, Shiraz Holdings announced its departure from the industry and that it would not be able to repay its debt of \$1 800 owing to Umar. This amount is to be written off.
- 2 On 18 February 2024, Jayla Enterprise confirmed that it was ending its business and could only pay 40 cents for every dollar of its outstanding debt of \$2 600. On the same day, Umar received a cheque from Jayla Enterprise for the amount it could pay.

On 30 June 2024, the trade receivables balance was \$50 500 and Umar maintains an allowance of impairment of trade receivables at 2% of the trade receivables balance at every financial year.

REQUIRED

(a) Prepare the allowance for impairment of trade receivables account for the year ended 30 June 2024.

Date	Particulars	Debit	Credit	Balance
2023		\$	\$	\$
Jul 1	Balance b/d			4,500 Cr [1]
Dec 6	Trade receivables – Shiraz Holdings	1,800 [1]		2,700 Cr
2024				
Feb 18	Trade receivables – Jayla Enterprise	1,560 [1]		1,140 Cr
	(\$0.60x\$2,600)			
Jun 30	Impairment loss on trade receivables	130 [1]		1,010 Cr
	(2%x\$50,500)-\$1,140			
Jul 1	Balance b/d			1,010 Cr

Allowance for impairment of trade receivables

[2]

(b) Use an accounting theory to explain the purpose of recording an allowance for impairment of trade receivables.

According to the prudence theory [1], the accounting treatment chosen should be the one that ensures the trade receivables balance is not overstated and reflects the amount that is collectible [1].

Umar sells its goods mainly on credit. The credit policy to his customers is as follow.

- 1 Credit period is 15 days.
- 2 Cash discount 1% is given if payment is made earlier within 5 days. Most of Umar's customers are able to pay within 5 days.

Mavis Enterprise, an online sports shop, has approached Umar to buy sports equipment on credit. As Mavis Enterprise has only been in business for under one year, Umar did his research on Mavis Enterprise and found the following information: UDIO

- 1 Mavis Enterprise takes an average of 17 days to repay its debts owing.
- 2 It has a monthly trade receivables balance of \$35 000 compared to the industry average of \$10,000.
- 3 Mavis Enterprise does not have a physical shop and only operates online.
- 4 More customers are buying from online shops due to convenience.
- 5 In promoting its products, Mavis Enterprise is highly active on all social media platforms and has an average of 70 000 followers on social media.

REQUIRED

(c) Advise Umar if he should sell on credit to Mavis Enterprise. Justify your advice with three reasons.

Decision: Umar should sell on credit to Mavis Enterprise. [1]
Evidence 1: Mavis Enterprise operates online and does not have a physical store. [1]
Development 1: This means that she is able to save on rent expenses which are high. Lower
expenditures would mean that Mavis Enterprise is more able to pay Umar debts owing. [1]
Evidence 2: Due to convenience, more customers are buying online. [1]
Development 2: This convenience would lead to a greater demand of Mavis Enterprise's
products, leading to higher sales revenue and being more able to pay Umar debts owing. [1]

Evidence 3: Mavis Enterprise has a strong following of over 70,000 followers. [1]

Development 3: Being popular and active on social media would increase the visibility of the

brand and when more people recognise the brand, this would lead to an increase in

[7] [Total: 13]

Additional page

potential customers and sales. [1] Decision: Umar should not sell on credit to Mavis Enterprise. [1] Evidence 1: Mavis Enterprise takes 17 days to repay its debts compared to Umar's credit policy of 15 days. [1] Development 1: This would mean that Umar would take a longer time to collect cash affecting his liquidity position should he need cash for other business areas. [1] Evidence 2: Mavis Enterprise average trade receivables balances of \$35,000 which is \$20,000 above the industry average of \$10,000. [1] Development 2: This above average balance could mean that the business is having issues collecting debts owing, thus, having cash flow problems. This could mean that the business might not be able to pay Umar debts outstanding. [1] Evidence 3: Mavis Enterprise has only been in business for less than one year. [1] Development 3: Being a new business could mean that Mavis Enterprise lacks brand recognition and this makes it challenging for the business to attract customers away from more established competitors, leading to low sales and having issues to pay Umar debts owing.
