Trade receivables Average net trade receivables X 365 days collection period (days) Net credit sales revenue

	31 August 2021	31 August 2022
Workings	(12000+16000) ÷2 x 365 days [1]	(16000+22000)÷2 x 365 days [1]
Trade receivables collection period (days)	28.71 days [1]	35.03 days [1]
		[4m]

(b)

Question 2

		~~	
1	Itaewon's trade receivables collection period has worsened from 28.71 days in 2021 to 35.03 days in 2022.	3 [1]	
2	This shows that the business is taking a longer time to collect payment from its credit customers this year as compared to last year.	[1]	1 mark per
3	More significantly, the trade receivables collection period of 35.13 days on 31 August 2022 has exceeded the credit terms of the business of 30 days.	[1]	suitable comment to
4	By taking a longer than usual period to collect payment from its cleon customers, Itaewon would have lesser each, causing its liquidity position to worsen.	[1]	a maximum of 3 marks.
5	Hence, Itaewon has become much less efficient at managing its trade receivables over the three years.	[1]	*** *** *** *** *** *** *** *** *** **
	Mat night		[3m]

(c)			
1	Improve billing efficiency by send out invoices as quickly as possible after completion of work and stating payment terms clearly.	[1]	
2	Incentivise early payments by offering customers discounts or rewards for early payment of invoices.	[1]	
3	Take initial deposits or make progress bills to sustomers. A percentage of the total quote (20%, 50%) is to be paid prior to commencing work or at agreed stages throughout the job.	[1]	1 mark per suitable reason to a
4	Foster positive customer relationships through quality and timely work, and maintaining regular communication with customers.	[1]	maximum of 2 marks.
5	Invest in software system that monitors unpaid accounts and automatically send reminders, or assign a dedicated person to make phone calls for payments due.	[1]	
6	Engage customers proactively. Do not leave overdue payments for a long period of time. Make calls as soon as payment is overdue.	[1]	
		•	ſ2m

Sources of non-accounting information Economic outlook When the economy is not doing well, most businesses will be adversely affected [1] and the customer would be less likely to be able to repay his or her debts. [1] When the industry is booming, customer will more likely be able to repay his or 1 mark per her debts. suitable Reputation of customers source to a Positive reviews about the business can indicate the good reputation of a maximum [1] business. A customer with a good reputation is usually known for providing of 2 marks. quality goods and services. 4 Repayment history When a customer has a good track record of making prompt pay [1] business is more assured of his or her ability to repay debts.

Question 3

-	_	١	

Make a Decision	Decision A		Decision B	
Make a choice and state your decision clearly.	Purchase the van.	[1]	Lease the van.	[1]
Supporting Evidence & Explanation	Any Three Points 3 x 2m	[6]	Any Three Points 3 x 2m	[6]
Candidates should provide max 3 reasons to support their decision.	Cost savings The total cost of buying the van = \$8000 (down payment) + \$86400 (instalments) + 6 000 (modification) = \$100400. Assuming the life span of the van is ten years, each year depreciation is \$10400. Compared to leasing, the cost per year is 1200X12 = \$14400. Thus, it is cheaper to buy than to rent. Servicing and Maintenance Free servicing at authorized workshop for first 2 years, or 50,000km. Less hassle and less worries as yan is maintained at tip-top condition.	2	Liquidity of business If purchase van, Jungno needs to pay unfront immediately down payment of \$8 000 and the next 12 months, \$1440 installment each month. Working capital would decrease by \$25280, Jungno's current ratio of 1.98 may fall even lower if he were to own the van, if he leases, he only pays \$1200 immediately and also \$1200 month osubsequently. Liquidity of desiness will not be adversely affected. Servicing and Maintenance With leasing, the servicing of the van is taken care of. Should the van be on sf action, the leasing company only have a replacement van. This	2
Each reason should comprise of 1 basic		no.	requies the disruption of business delivery service, and he will be able to increase his service excellence to attract more customers.	2
statement for 1 mark which is then developed for an additional 1 mark – total 6 marks for discussing 3	Modifications to van Jungno can modify the ven to need the needs of his business Can optimize the use of van through modification and no be limited by the leasing company's specification of modification.	2	Modifications to van Carry out some modifications to van since van must be restored to original condition upon termination of lease. Divert cost savings to marketing on social media to enhance brand awareness.	2
reasons.	Vehicle ownership As the owner of the van, Jungno is allowed to use the van in other ways. He may even rent out his van to earn some additional income.	2	Delivery trials Jungno can trial delivery service. Not all customers may want this additional service if they feel that cost of delivery is passed on to them. Jungno can lease van first to assess needs before investing in van.	2

Marks will be awarded as follows:

- A decision only supported with basic statements will get only the decision mark and max three
- No additional developmental marks will be awarded where same basic statement is developed in

(b)

Depreciation of existing equipment	= [20% x (\$16000 - \$4200) x 6/12] + [20% x (\$16000 - \$4200)] = \$1180 + \$2360 = \$3540	[1]
Depreciation of new equipment	= [20% x \$5000 x 6/12] = \$500	[1]
Depreciation expense for equipment for the year ended 30 June 2022	= \$3540 + \$500 = \$4040	[1]

(c)

Net book value	= \$16000 - (\$4200 + = \$10620	\$1180)		
Gain on sale of non- current asset	= \$15000 - \$10620 = \$4380		٥٨	[1]
			-03	[1m]

two different ways.

Question 4

Liquidity is the ability of a business to convert current assets into cash to pay current liabilities. Liquidity is important for learning how easily a company can pay off its short-term liabilities and debts. [1]

A business needs to have sufficient liquidity to pay off its day-to-day operating expenses, reduce reliance on external financing, and be able in a good position to seize good investment or growth opportunities. [1]

[2m]

(b)
