Difference in purpose: а A bank loan is a fixed amount borrowed from the bank usually for a specific purpose e.g. to buy non-current assets or to expand the business. A bank overdraft is a situation where the bank allows the business to pay out more than the amount that it had deposited up to an agreed limit with the bank to overcome a temporary cash shortage. OR Difference in repayment duration A bank loan is usually repayable over a few years. A bank overdraft must usually be settled within one accounting period Loan repayment = 50000/10 = \$5000 Outstanding loan after Y1 = 50000-5000 = \$45000 Interest on loan Y1 = 2% x 50000 = \$1000 Y2 = 2% x 45000 = \$900 Loan usage for 2022 (Y2) Before repayment = 3 months (1 Jan - 31 Mar) After repayment = 9 months (1 Apr - 31 Dec) EOY adj = interest expense payable $= 9/12 \times 900$ = \$675 Interest expense incurred Y2 = 3 months Y1 interest + 9 months Y2 interest = 3/12x1000 + 9/12x900= \$925 **Particulars** Dr (\$) Date 2022 Dec-31 Interest expense (+E) (9/12 x 900) 675 Interest expense payable (+L) 675 Dec-31 Income summary (3/12x1000 + 9/12x900) 925 Interest expense (-E) 925 ci Interest expense understated \$1000. Profit overstated \$1000. Non-current liabilities overstated \$1000. 1
