

GREEN TRADE AND THE GLOBAL ECONOMY

Welcome to the Primer series.

Here you will find the weekly Primer articles and some curated resources to support teaching and learning.

While exploring the resources, we invite you to consider how the ideas within and across issues are interrelated. Activate your prior knowledge and draw connections between what you already know about green trade and its benefits for the global economy as you examine issues of green trade in different contexts and from different perspectives.

In this issue, we will:

- understand the importance of green trade and its benefits for the global economy;
- consider the role of cooperation and international relations in the pursuit of green trade; and
- explore how countries can be supported to engage in green trade
